Your Excellency,

I urge you to protect people with albinism from murder. Attacks on them have risen steeply in Malawi since November 2014.

Annie Alfred is one of many people with albinism in the country. Along with others like her, she is under threat from those who believe that killing her for her body parts will make them rich. Prove them wrong.

Please show them that far from riches, crimes against people like Annie are met with the full weight of the law.

Yours,
